

Peter Whitney, Kennebunk, ME.

I am whole heartedly in favor of removing the 3 Dams on the lower Mousam River in Kennebunk. Restoring the river to it's natural state is an obligation we all share.

As a resident of Kennebunk I am keenly aware of the ongoing debate about what to do with the dams. As a customer of Kennebunk Power & Light I understand the financial ramifications of all 3 options originally open to KPL and how this may effect what I pay for power.

To me it's simple though...we've altered the river to serve our purposes. Now that it no longer serves that purpose we are ethically and morally compelled to restore the Mousam to a free flowing river.
