

Jonathan Larrabee, Kennebunkport, ME.

As a Registered Maine Guide and a manufacturer of fly fishing equipment in Biddeford, there is nothing more that I would like to do than take clients to the Mousam River and fish for sea run trout, stripped bass or shad if the habitat can be restored. Take down the dams. Restore the natural stream. Because of COVID there has been a surge in interest and people recreating outdoors. The economic impact to the Kennebunks that removing the dams will have, will far exceed the any existing benefit they currently or potentially will have. Have the dams removed for safety and any wildlife biologist will tell you that there is no benefit to fish ladders.

Jonathan Larrabee

Registered Maine Guide

Larrabee Outfitters LLC

Owner of Kennebec River Fly and Tackle & HMMH fly tying.

Descendent of Stephen Larrabee who built the garrison fort on the Mousam River in 1724.
