

Stephen Borst, ALFRED, ME.

I am in support of removing the first 3 dams on the Mousam River. Not only do they cost more to operate and the electricity they generate, they are a detriment to the aquatic life of the river. I am an avid fly fisherman and fish the Mousam often. These dams prevent brook trout from going upstream to spawn like nature intended. The dams also prevent 'sea run' trout from entering the watershed. Please make the right decision and do what you can do for the conservation of wildlife/aquatic life on the Mousam River!!

Thank you
