

Michael Green, Kennebunk, ME.

I have a straightforward ask. Because the dams owned by Kennebunk Light & Power District (KLPD) are being decommissioned, I ask that the Federal Energy Regulatory Commission require the removal of the dams in Kennebunk be a requirement of the license surrender.

I live in Kennebunk, I fly fish and I love the outdoors. The removal of the dams is not only good for all the species of fish that inhabit that river, it's simply good for the environment.

When I am done with my car I just don't leave it where it is parked and walk away from it, for someone else to deal with. It should be the responsibility of KLPD to remove the dams in a responsible and environmentally friendly way as they walk away from these dams.
