

Elizabeth Streeter, Portland, ME.

I am writing to ask you to order removal of the first three dams on the Mousam River, in the "License Surrender" process by Kennebunk Light and Power District. The dams are no longer used to generate electricity and are harming the environment of the river. They block brook trout and many other species from using the river and tributaries for spawning and other life cycle activities.

Thank you for considering this request. Maine has been working hard to restore our rivers and this would be a very positive addition to our efforts.
