

YOUR CONSUMER OWNED ELECTRIC UTILITY SINCE 1893

Many of our customers are accustomed to seeing Elaine Meyer, KLPD's meter technician, in their neighborhood. Because some of our meters are automatically read by our PLC system, many customers are not.

KLPD is taking GIS inventory of our automated meters. In order to get the most accurate information possible Elaine will be 'blanketing' the District with her handheld device to acquire the GIS coordinates.

Elaine will always be travelling in a marked KLPD vehicle and will be wearing some sort of KLPD attire. You'll recognize her by her smiling face and personable demeanor. Ask her what she is doing there and there will be no question in your mind that Elaine is on the up and up. She bleeds KLPD through and through.

If you have any questions or concerns, please email me at tshea@klpd.org, or call 207-985-3311.

Please spread the word to your neighbors, and thank you for your attention to this matter.

Have a wonderful day!

Todd Shea
General Manager/Treasurer
Kennebunk Light & Power District
