

brian j beaudette, KENNEBUNK ME, ME.

I am a home owner on the Mousam River in Kennebunk. In early Spring, my property had the worst flooding that I've ever had since moving here in 2013.

This is of great concern for me in light of the devastating flooding that took place twice in recent years. Now that Kennebunk Light & Power is no longer the stewards of the dams, what will prevent another devastating flood along its banks. The idea of letting the dams stay in place is mind boggling to me for both a safety standpoint and an environmental standpoint. It breaks my heart to walk down to Rotary Park and view the hundreds, if not thousands, of migratory fish trapped at the bottom of the Kessler Dam. I beg that a decision is made quickly to demolish the dams.
